Erratum
for
‘Denotational semantics for the simplified lambda-mu calculus and a new
deduction system of classical type theory’ by Ken Akiba

(Kin U. Kohlenbach, S. van Bakel, and S. Berardi (Eds.), Proceedings of the 6th
International Workshop on Classical Logic and Computation. EPTCS 213
(2016): 11–23. DOI: 10.4204/EPTCS.213.2)

Ken Akiba

There is an error in item 10 \((\beta_{\mu}\)-equality) in the list of inference rules in the
theory of \(\beta\eta\mu\)-equality presented on the third page (p. 13) of the paper. The re-
striction ‘if \(Q_{\sigma}\) is not of the form \((\lambda x_{\sigma} P_{\perp})_{\sigma}\)’ should be added as the condition
for application. Otherwise \((\lambda x_{\sigma} P_{\perp})_{\sigma}(\mu x_{\sigma} P_{\perp})_{\sigma}\) would be given conflicting re-
ductions by item 10 and item 8 \((\beta\)-equality). We thank Koji Nakazawa for
pointing out the error in the presentation of the paper at the 6th International
Workshop on Classical Logic and Computation (Porto, 23 June, 2016) and Ste-
fano Berardi for a helpful discussion afterwards.
